۴	Note-taking is a necessary part of the language learning. It helps students learn, keep, and remember information. Taking notes make them think differently about the subject; it requires the learners to look at things differently. It also helps them pay attention during the class because they are actively listening and experiencing in the classroom. Not only do the students meet their needs by taking good notes in English classes, but everyone should find note-taking as the best way to work with written and spoken texts. Taking notes let learners check interesting points from what they are researching, reading or listening to. Writing some parts in their own words, also called note-making, makes everything clear for the notetakers when looking back at the text. It is a much better learning technique than just depending on your own memory. Remember that word-for-word note-taking can hurt systematic thinking as it takes away the time of explaining ideas through examples and pictures by just writing down facts without context. It is why Isaac Newton said that he did great things just because he was sitting in the great men's classes and taking notes. ♦ True / False							ember pok at ag and nglish Vaking some oking ember ideas hat he lse
